

Research Forum - Monday, June 10, 2019, 12 to 1 pm

The aging immune system: defects and intervention points

The Research & Development team invites you to attend a lecture by **Dr. Janko Nikolich-Žugich, PhD**, Professor and Head, Department of Immunobiology at the University of Arizona.

This talk will discuss current knowledge regarding the old immune system in mice, non-human primates and humans.

Data from all three systems will be presented to illustrate a complex interactome over time between cell-autonomous damage to lymphocytes, deterioration of microenvironments essential to maintenance and function of lymphocytes, and the common external factors, particularly persistent viruses, that live within us for life.

Points of intervention to restore host immunity in the old age will be discussed.

Date/Time: Monday, June 10, 12 to 1 pm

Location: Building 5E, Auditorium 5104 ABCD

Presenter: Janko Nikolich-Žugich, PhD

Lunch will be offered to the first 50 people at 11:45 am. Please come early to secure a seat.
